Insect growth regulator properties in boiled edible plant products against rice Armyworm *Mythimna seperata* (Walker) (Lepidoptera : Noctuidae)

Sucheta Shah Mehta

Received May 21, 2014 and Accepted September 11, 2014

ABSTRACT : Insect Growth Regulator properties have been reported in the artificial diet developed for laboratory mass rearing of *Mythimna seperata* using boiled form of sixteen different cereals and pulses. Semi synthetic diet is a prerequisite for maintaining mass culture of insects.

Key Words : *Mythimna seperata* ,IGR, artificial diet, boiled.
