**ABSTRACT :** Study was conducted in varanasi District of UP in 2006 for the 65 fish farmers. The fish farmers were belonging to three categories viz. small, medium and large fish farmers. The large fish farmers were constituting maximum. The agency gives first preference to the low income groups of professional fisherman community as they were able to manage the fish culture in better way than the other categories.

**Key Words:** Socio-economic analysis, inland fish production.
